Trackstack

Reaching new heights

Ease of Use

The EC approved PPI Trackstack 6036 features a hydraulic head section allowing for quick, efficient compact road transportation as well as allowing for a rapid set up time and ease of movement at its final job destination.

Controls

Easy to use fully operational dog-lead remote control allowing for versatility and outstanding manoeuvrability.

Power Pack

The PPI Trackstack is powered by a Deutz 3 cylinder 32Kw Diesel power pack, directly linked to the hydraulic pump in order to drive both the numerous motors and the hydraulic folding mechanism.

Chassis

With its powerful chassis and heavy duty tracks the PPI Trackstack ensures optimum stability and strength regardless of its applications.

Versatility

The exceptional design of the Trackstack 6036T allows for tail drum height adjustment whilst at the same time maintaining the head drum height therefore allowing for an increased stockpile capacity. With an adjustable feed boot height of 1412mm (4.6ft) up to an impressive 2468mm (8ft 1") the Trackstack 6036 is unrivalled in its field. This single man conveying operation can receive crushed material and safely stockpile over a quarry face or bench. Its versatility allows for any application whether it be stand alone crusher fed, or installed in a close circuit application dealing with crushed stone, sand and gravel, crushed glass, coal and bark etc.

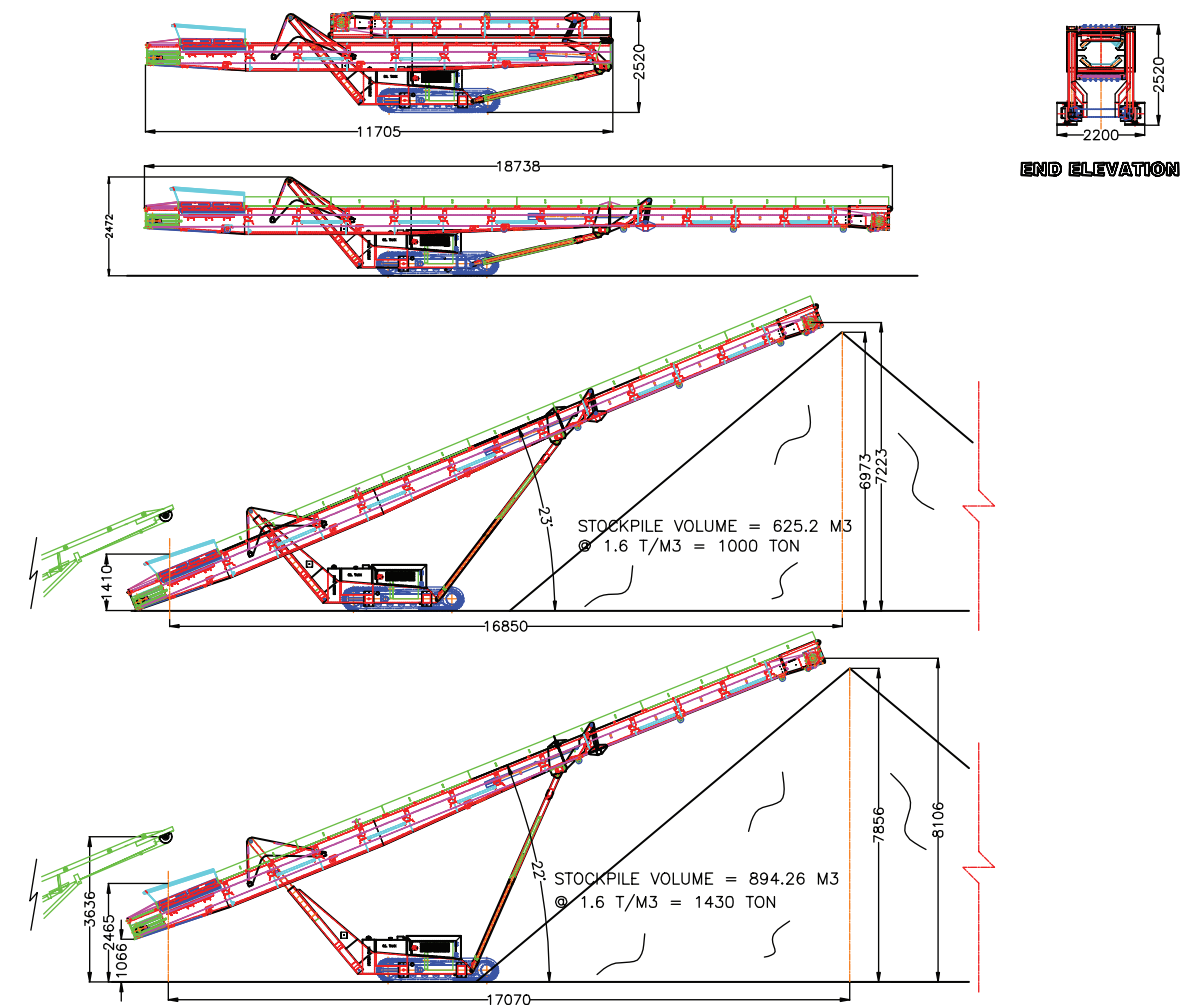

Machine Specifications

Belt Width: 900mm (36")
Belt Length: 18738mm (61.5ft)
Max Conical Stockpile Capacity: 1576 Metric Tons
Transportation Length: 11705mm (38.4ft)
Transportation Height: 2520mm (8.2ft)
Track Width: 2200mm (7.2ft)
Machine Weight: 11200 Kgs

Optional

- Hydraulic folding conveyor
- 4 cylinder 42 KW Diesel Power Pack for production up to 500 tph
- Wear resistant hopper liner plates
- Dust Covers (canvas or metal fabrication available)
- Dust/Water Suppression
- Discharge dust chute
- Picking station
- Full radio remote control for travel and operation
- Conveyor painted - dealer or customer colour

Technical Specifications

Features and Benefits

Low cost stockpiling solution with today's ever increasing fuel prices

Optimum flexibility and mobility with the highest possible performance

Heavy duty steel construction

Compact transport dimensions

Quick set up time

Proven reliability
